Technical Product Manager (w/m)

*For our customer we **immediately** search for a responsible and enthusiastically personality to enhance a high-quality IT-Team in **Austria (fulltime)***

Your responsibilities:

- Drive the development of cutting-edge technologies from an end-to-end-perspective
- Manage stakeholders including product and design teams within the organization as well as across different organizations including external partners
- Lead the development of early stage proof of concepts including, for instance, the creation of mock-ups and the definition of requirements
- Work closely with our product and design teams to embed leading technologies, such as machine learning, in existing traffic solutions as well as in new areas of application
- Represent project and research results at international conferences and venues as well as customer sites

Your Profile:

- Masters/PhD degree in computer science, electrical engineering, mathematics, physics, software engineering, or similar
- At least 5 years of professional experience in project management and/or technical product management
- Ability to actively drive proof of concepts as well as to transform the same into performant applications and products
- Proactive mindset to drive collaboration between teams in an intercultural and cross-organizational environment
- Experience in state-of-the-art machine learning frameworks and approaches is a benefit
- Familiar with Agile and Scrum development methodologies.
- Strong analytical problem-solving and decision-making skills

Customers Offers:

- An interesting full-time position with high responsibility within one of our growing markets
- A market compliant gross salary – minimum € 55.000 p.a. - according to your qualifications and your job experience
- A hands-on onboarding with an experienced team to get familiar with the business and domain-related processes
- An international working environment and exciting challenges with room for new ideas
- Social benefits and infrastructure (operating restaurants, near subway etc.) of a modern company
- Bridge Days Regulation and flexible working hours etc.
- Ongoing professional education and training measures
